Skanska Awarded First Road Assignment in Northwestern U.S.

Seattle, W.A. – Skanska is expanding its infrastructure construction and civil engineering operations to the northwestern U.S. The first road assignment in the state of Washington is for the Alaskan Way Viaduct in Seattle. The contract amounts to \$115 million, which will be included in order bookings for the second quarter.

The customer is the Washington State Department of Transportation.

The project involves the construction of a new 0.8-mile viaduct on the southern section of the Alaskan Way on the State Route 99 bypass in downtown Seattle.

The new stretch will be built in parallel with and replace the existing heavily-trafficked road. The new construction will increase capacity and improve the earthquake resistance.

The project will be conducted by Skanska USA Building and Skanska USA Civil, which now have a joint base in Seattle, Washington.

“It is our strategic intention to also become established within infrastructure construction and civil engineering in this expansive region, where we have a long tradition in building construction. It is highly gratifying that we have now secured our first road contract and I am certain that we will expand in this market,” says Mike McNally, Executive Vice President of Skanska and the member of the Senior Executive Team with responsibility for operations in the U.S. and Latin America.

Work will commence in summer 2010 to be completed in 2013.
