Skanska Promotes Chris Hopper to Project Executive

Cincinnati, Ohio – Skanska USA's building business unit, a leading provider of construction management, preconstruction and design-build services, announced today that Chris Hopper has been promoted to project executive in the Cincinnati office.

Hopper joined Skanska in May 2005, and recently played a central role in the opening of Skanska's new Cincinnati office. For the past three years, he has served as a senior project manager, leading projects such as the \$138 million Atrium Medical Center in Middletown, Ohio, and the \$176 million LEED-Silver Miami Valley Hospital in Dayton, Ohio. In his new position, Hopper will oversee all projects managed by the Cincinnati office. He is currently overseeing a \$50 million addition at Miami Valley Hospital South in Centerville.

On the Miami Valley Hospital project in Dayton, the team, under Hopper's onsite leadership, implemented prefabrication practices that were deemed the "most ambitious U.S. implementation of the strategy" by Engineering News-Record. The project team was named by the magazine as one of the top 25 newsmakers in the industry for 2010.

Hopper is a graduate of Purdue University with a Bachelor of Science in civil engineering.

Skanska USA is one of the largest, most financially sound construction networks in the country serving a broad range of industries including healthcare, education, sports, data centers, government, aviation, transportation, and water/wastewater. Headquartered in New York with 35 offices across the country, Skanska USA employs approximately 7,000 employees committed to sustainable construction and an injury-free workplace. Skanska USA Building, which specializes in building construction, and Skanska USA Civil, which is focused on civil infrastructure, generated \$4.8 billion in revenue in 2010, representing 31 percent of Skanska's global construction revenues. Additional operations in the U.S. include Skanska USA Commercial Development, which pursues commercial development initiatives in select U.S. markets, and Skanska Infrastructure Development Americas, which develops public-private

partnerships. Global revenue of parent company Skanska AB, headquartered in Stockholm and listed on the Stockholm Stock Exchange, totaled \$16.9 billion in 2010.
