Skanska USA Hires Frank Forcino as Vice President, Account Manager of Interiors for Metro New York Office

New York, NY - Skanska USA, a leading provider of construction management, preconstruction, and design-build services, announced today it has hired Frank Forcino as vice president, account manager of interiors for its Metro New York office.

Forcino brings more than 40 years of construction experience to Skanska, during which he focused primarily on the tenant improvement market, completing interior work and fit-outs to improve space for influential companies within New York and New Jersey. His extensive experience also includes developing data centers, luxury retail and high-end executive suite office space for various industry sectors, including financial services, legal, mission critical, real estate, healthcare and pharmaceutical.

In his new role as vice president, account manager of interiors, Forcino will work closely with the business development team for Skanska's Metro New York office, to leverage his longstanding relationships he has built throughout his career. Forcino will also spearhead projects focused on tenant improvement plans, overseeing the construction process from preconstruction to execution.

"Frank thoroughly understands how to approach and work with clients that require projects to be delivered in a time-sensitive manner," said Tom Webb, executive vice president and general manager for Skanska USA Building's New York Metro office. "He has a strong track record of delivering successful large-scale projects on schedule and under budget. His knowledge and experience, coupled with his proactive problem-solving and resourceful nature, will be extremely valuable to Skanska."

Prior to joining Skanska, Forcino most recently served as a project executive for Turner Construction where he worked on various projects throughout the Metro New York and New Jersey region.

Forcino received his bachelor's degree in criminal justice from St. John's University in New York City.

Skanska's Metro New York office has completed a variety of complex projects for a wide-range of industries, including education, healthcare and transportation. Skanska is currently constructing Merck Sharp & Dohme Corp.'s new biologics research facility located in Kenilworth, NJ, Panasonic's new North American Headquarters in Newark, NJ, and converting an existing New York Public Library book storage facility into the new Beacon High School for the New York City School Construction Authority (NYCSCA). Skanska also recently completed the 596,492-square-foot expansion for Capital Health Medical Center located in Hopewell, NJ.
