Skanska USA Hires Mark Miller as Project Director for Growing Connecticut Office

New Haven, CT – Skanska USA Building, a leading provider of construction management, preconstruction, and design-build services, announced today it has hired industry veteran Mark Miller, 43, as project director for its growing Connecticut office.

Miller brings more than 21 years of construction expertise to Skanska and a history of completing many successful projects on time and under budget to a diverse group of clients. His experience spans across a wide range of industries, including, healthcare, research, hospitality, municipal, higher education, office, mixed-use facilities and parking. Miller has also delivered various project types, such as private-public partnerships and complex industrial infrastructure projects, including nuclear and fossil fuel power/cement production facilities.

“We’re excited to welcome Mark to our growing team. His strong background in healthcare, pharmaceutical, and commercial construction combined with his drive to exceed client expectations makes him an extremely valuable asset to us,” said Al Gogolin, senior vice president for Skanska’s Connecticut office. “As a seasoned industry professional with a knack for fostering new business, Mark will make stellar contributions and help continue to expand our office. I’m looking forward to working closely with him as we embark on an exciting year ahead.”

Before joining Skanska, Miller served as director of science and technology for Turner Construction Company.

He graduated from Case Western Reserve University in Ohio with a Bachelor of Science in civil engineering. He then went on to study at the University of South Florida where he graduated with a Master of Business Administration. Most recently, he graduated from Harvard University’s Graduate School of Design with distinction where he earned a Master of Design in real estate and urban development.

Miller is a licensed professional engineer and certified general contractor, as well as a LEED Accredited Professional. He is also a member of the United States Green Building Council (USGBC) and the Urban Land Institute (ULI). In addition, he is a government affairs committee representative for National Association for Industrial and Office Properties (NAIOP).

Skanska’s Connecticut office has completed significant projects throughout the state and region for a variety of clients in higher education, healthcare and data centers. Notable projects include the construction of Oak Hall, a highly sustainable building for the University of Connecticut, which is now home to the school’s Liberal Arts and Sciences’ departments, and the construction of the Outpatient Diagnostic Building for Danbury Hospital. Skanska’s Connecticut

office recently secured a contract to provide the Stamford Hospital with significant infrastructure upgrades, including building a new 3,100 square-meter central utility plant, additional surface parking lots, and site work such as utilities. Construction work on this project commenced this summer and is expected to be completed in August 2016.
