Skanska wins another industry leading award

Skanska Rashleigh Weatherfoil (SRW), Skanska's mechanical and electrical arm, has picked up an award for driving down energy consumption, costs and carbon emissions.

SRW, was recognised for the green retrofit of Hollywood House, their own office in Woking, Surrey, in the 'Time-proven mechanical and electrical installation' category at the Heating & Ventilation News awards.

The work at Hollywood House has seen carbon emissions, energy consumption and water use significantly reduced while providing a comfortable, energy efficient environment for the Skanska team based there.

Martin Neeson, SRW's Managing Director, said: "Hollywood House is a flagship project and is a shining example of what we do. All the hard work and effort from the initial idea, the planning, implementing, monitoring and maintaining has paid off. Everyone involved in the project should be very proud."

Heating and Ventilation News notes: "This category reflects the standards that all companies should be striving to achieve, recognising projects that have been correctly designed followed by the installation and commissioning of systems that will perform to the correct levels for many years to come."

The award is the second recent success for the mechanical and electrical team. Just last month they won the Low Carbon Excellence category at the Construction News Specialist Awards, again for their efforts in improving the energy efficiency and reducing carbon emissions.

Notes for the editor

- For more information on The H&V News awards 2013 go to <http://www.handvawards.com/Home>
- Skanska is one of the world's leading project development and construction groups. The UK operation is one of the country's top 10 contractors with 4,000 employees in the UK.
- Skanska is famous for building iconic structures like 30 St Mary's Axe (the Gherkin), Heron Tower, and the QEII Bridge. A recent project highlight is the design, construction, operation and maintenance of the UK's biggest hospital project, the £1 billion redevelopment of St Bartholomew's and The Royal London hospitals.
