Skanska USA Promotes Preconstruction Expert Mark Johnson to Senior Vice President, National Preconstruction Director

BOSTON – Skanska USA announced today the promotion of Mark Johnson to senior vice president, national preconstruction director. In his new role, Johnson is responsible for managing Skanska’s preconstruction efforts throughout the Northeast for Skanska USA Building, including Greater Boston, Connecticut, New York, New Jersey, and Pennsylvania. He remains based in Skanska’s Boston office.

Johnson manages Skanska’s staff of preconstruction experts, which includes LEED®-Accredited Professionals and Save International Associate Value Specialists, to ensure projects are completed in the most cost-efficient manner without compromising quality.

“With more than 33 years of experience, Mark is recognized as one of the region’s premier preconstruction executives,” said Paul Hewins, co-chief operating officer for Skanska USA Building. “Mark understands the components of our clients’ most complex projects. His effective leadership and ability to advise owners and design teams throughout the preconstruction process – one of the most critical stages in the life of a project – is unparalleled. Mark consistently adds value to Skanska’s expanding Northeast team.”

During his 33 years with Skanska, Johnson, along with Skanska’s Boston-based preconstruction group, has helped establish preconstruction as one of Skanska’s core specialties in New England. He has played a substantial role in the renovation and expansion of the Harvard Art Museums, Harvard Business School’s Baker Library, the construction of Harvard Law School’s Wasserstein Hall and Caspersen Student Center, and the Springfield Data Center for the Commonwealth of Massachusetts.

Johnson has a degree in building construction from Wentworth Institute of Technology. He is a member of the American Society of Professional Estimators.

Skanska USA is one of the largest, most financially sound construction and companies networks in the country, serving a broad range of industries including healthcare, education, sports, data centers, government, aviation, transportation, power, energy, water/wastewater and commercial. Headquartered in New York with 39 offices across the country, Skanska USA employs more than 8,300 employees committed to sustainable construction and development and an injury-free workplace. Skanska USA Building, which specializes in building construction, and Skanska USA Civil, which focuses on civil infrastructure, generated \$5.8 billion in revenue in 2012, representing 30 percent of Skanska's global construction revenue. Development units Skanska USA Commercial Development, which invests in and develops office and multi-family projects in select U.S. markets, and Skanska Infrastructure Development North America, which develops public-private partnerships, are both leaders in their selected markets. Global revenue of parent company Skanska AB, headquartered in Stockholm and listed on the Stockholm Stock Exchange, totaled \$19.5 billion in 2012. Skanska shares are publically traded in the U.S. on the OTC market under the symbol SKBSY through a Level I American Depository Receipt program.
