Skanska builds office and garage in Skövde, Sweden, for about SEK 340M

Skanska has signed an agreement with the municipal company Kreativa Hus Skövde AB to build an office building with an adjacent parking garage in central Skövde, Sweden. The agreement is worth about SEK 340M, which will be included in the order intake for Sweden in the first quarter of 2025.

The office building will be seven stories high with a gross area of 11,100 square meters. There will be flexible and surface-efficient premises as well as an atrium in the middle of the building which will form a natural meeting place. The assignment also includes preparing an energy sharing solution between the newly built house and neighboring houses to share electricity and cooling. A square will also be built in the area, where there is currently a parking lot.

The parking garage will be four stories high with a gross area of 4,500 square meters. It will be built together with the new office building. During construction, a climate-reduced concrete frame is used and there will be a limited use of steel in the construction.

Construction will start shortly and the intention is for the project to be completed in the first half of 2027.
