SKANSKA USA BUILDING AND UNIVERSITY OF CENTRAL FLORIDA OPEN DOORS TO NEW HEALTH CENTER

The University of Central Florida (UCF) recently held a grand opening ceremony to officially launch the new Health Center. Skanska USA Building Inc. and the joint venture architectural team of Mateu/HuntonBrady were involved in the construction and design of the facility. The total value of this project is estimated to be \$8 million. UCF is a repeat client for Skanska.

“We are honored to have been part of a project that will provide essential healthcare to UCF students, faculty and staff,” said Skanska Senior Vice President Matt Breen.

The project included the construction of a new 48,725-square-foot, three-story health center that functions as the basic medical service provider for students, faculty, and staff at the university. The center provides basic exams, x-rays, blood work and check-ups. The center also has a fully functional pharmacy, a women’s clinic, numerous administrative offices, several meeting rooms, and various medical supply storage spaces. There is also space, which may be allocated in the future, for additional medical services, such as a dental office. In addition to the new facility, the project included the renovation of the existing 13,508-square-foot Student Health Center, which is located adjacent to the new facility, and will house both the Counseling and the REACH (Health Education) departments.

Skanska USA Building Inc. is a leading national and local provider of construction, pre-construction consulting, general contracting, design-build, and pharmaceutical validation services to a broad range of U.S. industries, including pharmaceutical and biopharmaceutical, educational, high-tech, healthcare, aviation, transportation, and sports and entertainment. The company, part of the Skanska AB global group of companies, is headquartered in Parsippany, New Jersey, and has approximately 4,100 employees.

Skanska AB, based in Stockholm, Sweden, is one of the world’s leading construction groups with expertise in construction, project development of commercial and residential projects, and public-private partnerships. Skanska is committed to finding innovative solutions by cooperating closely with customers and combining the company’s international

expertise with local presence. The Group currently has 53,000 employees in selected home markets in Europe, in the US, and Latin America. Sales in 2004 totaled \$17 billion.
