Freeman Joins Skanska as a Project Executive in the New York Office

New York, N.Y. – Skanska USA Building Inc. announced today that Jennifer Freeman has joined the New York office as a Project Executive.

“Jenny’s distinctive expertise in healthcare and cultural institutions fits right in with Skanska’s focus in New York,” said Steve Pressler, New York Area Executive Vice President. “We expect that her training as a mechanical engineer will be a great asset on a variety of Skanska projects and to support our commitment to being the leading green construction company in the United States.”

A licensed engineer, Freeman brings with her over 22 years of experience in the construction industry. She has worked on various New York area hospitals, universities, and cultural projects and is now responsible for Skanska’s work at the new Emergency, Trauma and Education Centers at the Staten Island University Hospital and the Emergency Department expansion at Beth Israel Medical Center.

Freeman is a member of the American Society for Healthcare Engineering and a LEED Accredited Professional. In 2005, while working for Bovis Lend Lease, she received the *Health and Facilities Management VISTA Infrastructure Award* for her excellence in teamwork in sustainable building design and construction on the North Shore Long Island Jewish Hospital. Freeman holds a Bachelor of Science degree in Mechanical Engineering from the University of Michigan.

In addition to the Staten Island University Hospital additions, Skanska is the construction manager for these major projects: Madison Square Garden renovation; several segments of the five-mile-long Hudson River Park in Manhattan, including the restored pier for the Intrepid Sea Air & Space Museum; the new Brooklyn Bridge Park; and the CUNY Advanced Science Research Center.
