

Gas Production Facilities

Araibel Gas Compression Plant

Project

Client
Pérez Companc S.A.

Location
Anzoátegui State,
Venezuela

Period
2001

Participation
Skanska LA: 100 %

Skanska LA executed the engineering, construction and start up of 6 gas compressors (3 of Gas Injection and 3 duals). Each compressor capacity is of 10 MMSFD, compressed to an output pressure of 1,500 and 3,500 PSIG, having an intake pressure of 60 PSIG. The total installed power ascends to 14,400 HP.

Civil Work

Ground movement, construction of equipment foundations, draining works, internal roads, concrete works and excavations.

Electric Work

All electrical installation including lightning system, ground connection, generator and automatic electricity system, cathodic protection, switches and boards supply and installation.

Mechanical Work

Pipes supply and installation, valves and pipes accessories supply and installation, installation of venting equipment, tanks, pumps, installation and connection of process equipment, construction of catwalks and general welding.

Additionally, Skanska LA executed the operation and maintenance of the plant. □
