Skanska Adds Director of Business Development to Oakland Office

Oakland, Calif. – Skanska USA Building Inc. announced today that its Oakland, California, office continues to increase its depth of executive talent by appointing John Maloblocki to Director of Business Development. Maloblocki has 23 years of experience in the construction industry, serving the past three with Skanska as a Project Executive.

“In this new position, I will be able to coordinate and manage regional pursuits as well as strategize our business-growth potential,” explained Maloblocki.

Director of Business Development is a new position for the Oakland office and is a function of its current growth mode. Maloblocki will be identifying and developing project opportunities, new clients and long-term relationships for the purpose of growing Skanska’s business in California.

“The creation of this position reflects Skanska’s commitment to one of the hottest markets in the country,” said Skanska Executive Vice President and Oakland Area General Manager Rick Millitello.

Maloblocki has been an integral part in putting in place the make-ready work for the 80,000-square-foot design-build Central Utility Plant project in downtown Sacramento. The new plant, when complete next year, will serve the heating and cooling needs of the State Capitol and 22 other state-owned buildings in downtown Sacramento’s Capitol Area. The project will be one of the largest such facilities west of the Mississippi River and is being built to meet the U.S. Green Building Council’s LEED® (Leadership in Energy and Environmental Design) Gold rating.
